

What is epilepsy?

1 in 100 persons in Malta have epilepsy...
do you know what it is?

Epilepsy is a hidden condition which may result in seizures due to abnormal activity in the brain.

Seizures usually last for a few seconds or minutes.

70% of persons with epilepsy have their seizures controlled with the medicines available.

Thus, persons with epilepsy can live a normal life.

X'inhi l-epilessija?

Persuna minn kull 100 f'Malta għandha l-epilessija...
taf x'jigifieri?

L-epilessija hija kundizzjoni li ma tidhirx, fejn iseħħu aċċessjonijiet minħabba attività mhux normali fil-moħħ.

L-aċċessjonijiet normalment idumu għal ftit sekondi jew xi minuti.

70% tal-persuni bl-epilessija, jikkontrollaw l-aċċessjonijiet permezz tal-mediċini.

Dan ifisser li jistgħu jgħixu ħajja normali.
